

## Chemistry – Learning Plus

### **What should students be doing in the ISA for Chemistry?**

- Use your syllabus given to you to ensure you are reading, watching and revising for the upcoming topics in lesson.
- Textbook exercises:
  - The Practice Question exercises (at the end of each section and the end of the chapter). Also practice questions found by topic on PMT.
- Past exam papers:
  - The easiest place to find and navigate these is on PMT. Here there are papers, mark schemes and student friendly mark schemes (written solutions). Seneca is a good alternative.

### **What resources should they be using for Chemistry?**

- PMT (Physics and Maths Tutor)
- SaveMyExams.com
- Seneca
- Resources on Team page
